(901) 276-2999 or (901) 828-8910 [cell]

Education

Rhodes College, Memphis, Tennessee, USA
Bachelor of Arts, Philosophy Major, December 1993

Certifications include RHCE (Red Hat Certified Engineer - Certificate Number: 807001341402964) and MCP (Microsoft Certified Professional - ID: 946027).

Skills

Professional and business skills are focused in five areas:

- System administration of existing networks (LAN and WAN) and construction of new networks
- Database application development and maintenance
- Building interactive web-based solutions utilizing powerful back-end data storage
- Troubleshooting problems within existing data-driven solutions and active network environments
- Writing technical documentation and incorporating graphic design

Skills include experience working in wide variety of computer operating systems, particularly Linux, Macintosh, and Windows (NT, 2000, XP). Familiar with a variety of network topologies and situations, and possesses strong network and server problem-solving skills. Also possesses strong HTML authoring skills, including familiarity with various new media technologies, including digital video editing and video streaming.

Acted as System Administrator on systems using Red Hat Linux, Windows NT/2000/2003, BSD, and Mac OS X. Database experience includes MySQL, Microsoft SQL Server, and Oracle 8i/9i using PL/SQL, as well as filling the role of Database Administrator (DBA) for an interactive hosting environment. Web Server Administrator experience includes Apache and IIS, using a variety of web scripting environments.

Possesses experience in caring for and nurturing relationships with clients in a Project Manager role, overseeing certain parts of the project while directly handling the construction in other areas of the project.

Also possesses the ability to use almost all major Windows and Macintosh design, publishing, and business-level applications including QuarkXPress, PageMaker, Illustrator, Word, Excel, Access, PhotoShop, FileMaker Pro, and several content-creation WWW applications, such as Adobe GoLive. Familiar with SGML and DocBook version 2 to 4 tags.

Personally driven to succeed, with a strong work ethic.

Work Experience

Rhodes College Memphis, TN, USA
Educational institution

Database Administrator; January 2003 – present
Fulfill a variety of roles, including database and system administrator for SCT Banner running on Oracle 8i and 9i on Solaris and Linux. Assist in the development and maintenance of the institutional research and reporting databases. Develop web technologies for use by the students, staff and faculty.

Mazzy Media & Consulting Memphis, TN, USA, and Sydney, Australia
Network consultation group

Senior Consultant; July 2001 – December 2002; September 1995 - August 1998
Acted as network topology architect and consultant for several Memphis businesses and non-profit agencies. Provided on-site support, installation and instruction for hardware and software requirements. Developed Internet interfaces geared toward client needs, including interactive databasing (invest2lease.com, terrascend.com, cathchar.org, epmlensing.com).

Red Hat, Inc. Durham, NC, USA
Premier worldwide leader in Linux and open source solutions

Technical Writer; December 2000 - June 2001
Author of the Red Hat Linux Reference Guide. Worked directly with Linux developers, in the Durham office and other Red Hat locations around the world, as well as with the Documentation Group team members to write and proof various technical documents by the company.

Vortex Creative Media, Inc. Memphis, TN, USA
New media company specializing in data-driven solutions
Chief Technical Officer; September 1998 - November 2000

Helped found the company, working with various investors and building relationships with clients to solidify the company. Single-handedly built several data-driven solutions, such as landandfarm.com (now theequator.com after the sale of the site). Worked with a variety of clients in both a Project Manager and Lead Developer role. Oversaw the creation of a Network Operations Center in Memphis as part of a company relocation to that city.
